

s•terra®

YOUR SMART GUIDE IN THE OCEAN OF SECURITY

- IPsec protocol suite
- Russian cryptographic algorithms
- Certified by FSB and FSTEC Russia
- Products are in the Russian National Software Registry

S-Terra CSP is a leading Russian software developer and manufacturer of network security solutions

SOLUTIONS FOR L2
AND L3 CONNECTIONS

PROTECTION FOR ANY
ENTERPRISE NETWORKS

PROTECTION FOR HIGH-PERFORMANCE
NETWORK COMMUNICATION CHANNELS

REMOTE ACCESS **PROTECTION**
FOR USER MOBILE DEVICES
AND WORKSTATIONS

SOFTWARE APPLIANCES

- C **S-Terra Client** Network traffic protection for user devices running Windows OS
- V **S-Terra Virtual Gate** Virtual appliances for VMware, Xen, KVM, Hyper-V and Fusion
- M **S-Terra CSCO-STVM** Software module for Cisco 4000 Series Integrated Services Routers
 - VPN with GOST cryptographic algorithms
- IDS **S-Terra IDS** Software suite for detecting threats by inspecting network traffic (intrusion detection system)

COMPUTER APPLIANCES

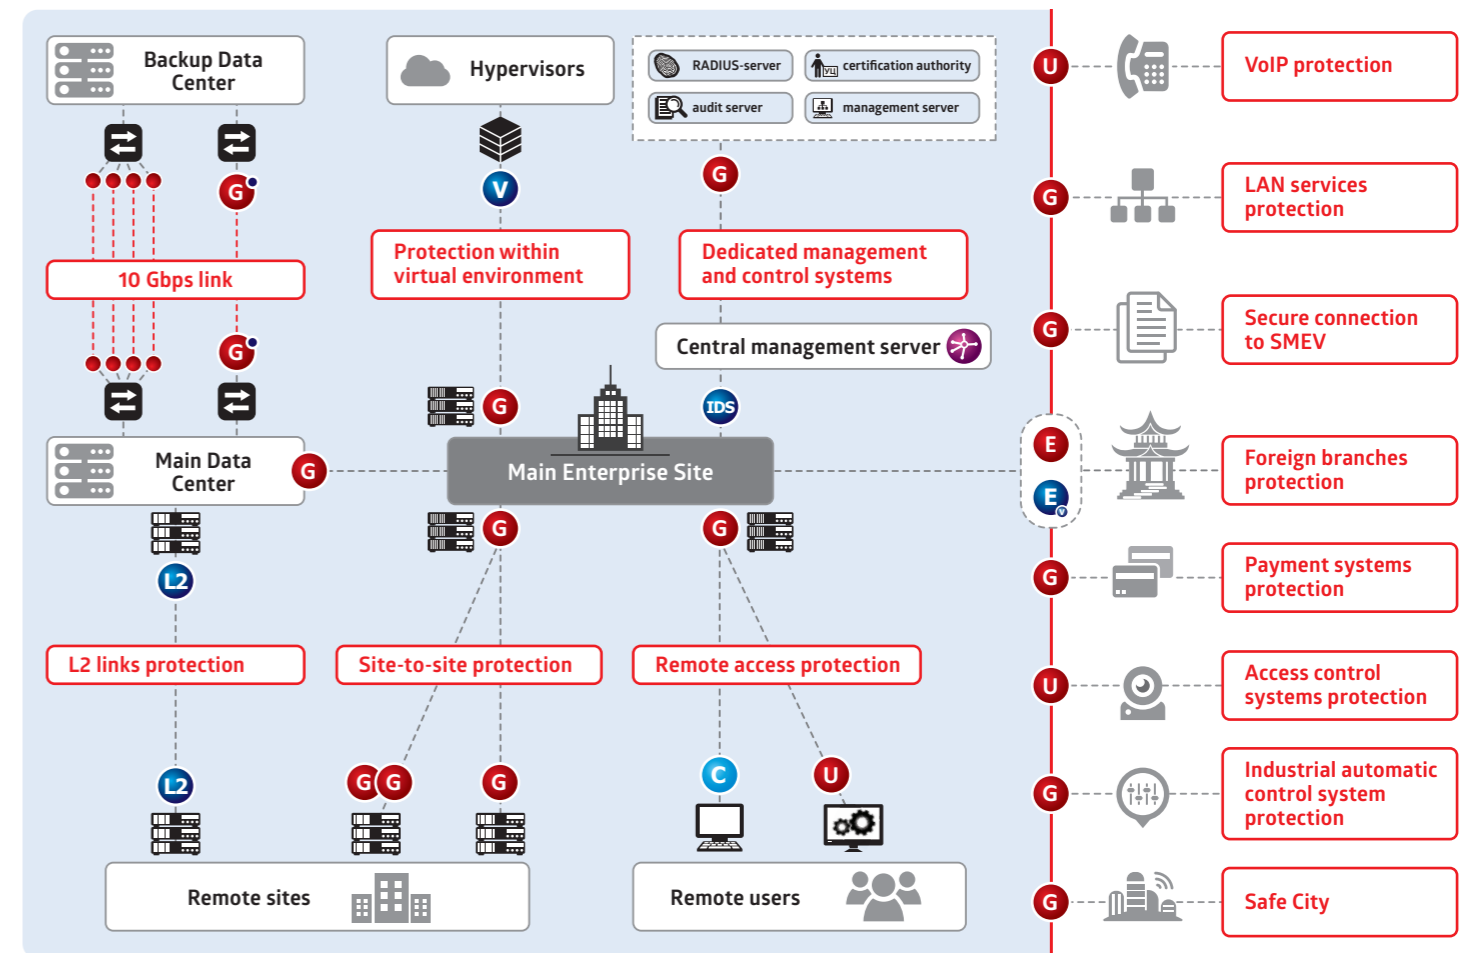

- G **S-Terra Gate** Traffic protection and filtering for any network architecture
 - product line offers various performance profiles
- G **S-Terra Gate 10G** High-end solution, featuring two data centers interconnection with a single pair of S-Terra Gates 10G
- U **S-Terra Unit** Miniature version of S-Terra Gate, designed for use in low-bandwidth networks
 - protects network traffic of any devices, regardless of their OS
 - features wireless connections protection

MANAGEMENT

- K **S-Terra KP** Centralized management and monitoring system

EXPORT EDITIONS

- E **S-Terra Gate E** S-Terra Gate Export Edition
- E **S-Terra Virtual Gate E** S-Terra Virtual Gate Export Edition

“S-Terra CSP” product line offers security solutions for any size networks: from small to federal scale. Various network topologies are supported, including point-to-point, star, hierarchical, mesh and fully connected networks.

Traffic protection is based on the use of **IPsec VPN** – worldwide established and reliable solution. **S-Terra products and solutions** can be easily deployed within existing corporate networks, ensured by modern protocols support and compliance with InfoSec regulators requirements.

S-Terra product line delivers protection for:

- users,
- servers,
- networks,
- other devices (ATMs, IP cameras, etc.).

S-Terra Gates Export Edition are used for cross-border traffic protection, providing security in communications between foreign branches of Russian companies. Feasibility of using them outside of Russian Federation is ensured by compliance with FSB official regulations. This grants a faster and easier legislative procedure of obtaining an export license.

ABOUT S-TERRA CSP

Formed in 2003, S-Terra CSP is a leading russian manufacturer and software development company, producing certified IPsec VPN network security solutions.

Our key features:

- implementation of latest cryptographic GOST standards,
- compliance with international IPsec specifications,
- FSTEC Russia and FSB certified products,
- transparent pricing,
- providing our customers with comprehensive technical support.

S-Terra CSP partnership network consists of more than 300 companies, including largest integration solution providers in Russia. We also have a representative office in the Republic of Belarus.

Simplicity of integrating S-Terra products into any network infrastructure is ensured by:

- proven and established architecture design,
- broad variety of typical solutions and unique use scenarios,
- hardware platforms of customer choice,
- complete documentation,
- responsive technical support service.

S-Terra products and solutions are used by:

- government organizations, from local to federal authorities,
- financial corporations, including largest banks,
- commercial companies, small and medium business,
- manufacturing companies, including federal organizations and large holding companies in energy sector.
